Hartejsingh Sandhu

Pune, Maharashtra | +91-9172354187 | reach.hartej@gmail.com
Portfolio | GitHub | Codeforces

EDUCATION

Ajeenkya DY Patil University (Newton School of Technology) *Pune, Maharashtra*
B.Tech, Computer Science *Expected Graduation: 2029*
CGPA: 9.41 / 10 | SGPA: 9.68 / 10

TECHNICAL SKILLS

Languages: Python, JavaScript
Frontend: React.js, HTML, CSS
Backend: Node.js, Express.js
Databases & Tools: MongoDB, PostgreSQL, Redis, PyTorch

EXPERIENCE

Developer Club *Core/Committee Member*
- Managed and coordinated a club event, handling planning and on-ground execution.

PROJECTS

HireAI *Team Project | GitHub*
- Collaborated within a team to rapidly prototype and develop an AI-driven resume screening tool.
- Leveraged AI capabilities to automate the parsing and evaluation of applicant resumes.

NST Helper *Node.js, Express.js, React.js | GitHub*
- Developed a full-stack platform to assist first-year students with assignments and academic productivity.
- Built a robust backend using Node.js and Express.js to manage user requests and assignment data.
- Designed an interactive React.js frontend, integrating AI tools to enhance the user experience.

URL Shortener *Node.js, Express.js, React.js, MongoDB, Redis | GitHub*
- Built a full-stack URL shortening service to convert long URLs into easily shareable links.
- Implemented Redis caching to significantly reduce database load and improve redirection response times.
- Used MongoDB for persistent storage of original and shortened URL mappings.

Tokenizer *Python | GitHub*
- Built three tokenizers from scratch in Python: a basic implementation, a regex-based tokenizer replicating GPT-2/GPT-3 patterns, and a GPT-4-style tokenizer using OpenAI's tiktoken library.
- Explored byte-pair encoding internals to understand how large language models process and split text.

Sticky Notes UI *JavaScript | GitHub*
- Built a drag-and-drop sticky notes interface in JavaScript, supporting note creation and free repositioning.

EXTRACURRICULARS & ACHIEVEMENTS

- Active competitive programmer solving algorithmic problems in Python on Codeforces.
